

Green Your Machines

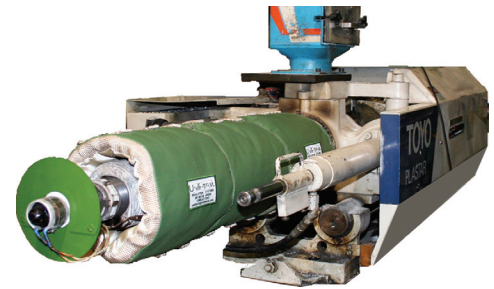

with UniVest from UniTherm

UNITHERM insulation systems

UniTherm Insulation Systems are high return, low investment insulation blankets that can reduce energy costs, protect employees, and lower the ambient air temperature in facilities. We offer both off-the-shelf blankets, cut to standard length and width to fit a range of applications and custom blanket solutions with notches, donuts, cut-outs, custom sizes, in custom materials and any other required specifications.

Ideal For

- » Plastics manufacturing machinery
- » Engines
- » Exhaust systems
- » Hot oil and steam piping
- » Backup/portable power generation
- » Mobile home and bus exhaust systems
- » Other industrial applications

Benefits

- » Lower energy bills
- » Faster machine start-up time
- » Lower ambient air temperature
- » Employee protection
- » Payback often less than 12 months

UniTherm has the capability to manufacture UniVest blankets for both under 500°F applications and over 501°F applications. We can create the right insulation solution for any application.
