

Increase Energy Savings

with custom extrusion line insulation systems

UniTherm | we mean green insulation systems

UniTherm Insulation Systems designs and manufactures energy saving insulation systems for sheet extrusion lines. These blankets are custom fit to your dies, flanges and feed pipe, so they will never be in the way. UniTherm unique design allows for easy access for die changes and adjustment lugs.

Benefits

- » Increased personnel protection
- » Reduced heat loss
- » Increased energy efficiency
- » Maintains easy access to die and adjustment lugs
- » Decreases ambient air temperature
- » Controls process
- » Reduces BTU by 88%

Design Components

- » 1" thickness
- » Custom design to fit each die
- » Easy application and removal
- » Magnet closure option
